HOW TO LOCATE PARTS

This Parts Catalog is divided into Groups (Part Type Codes) with a tab index to separate the Major Groups.

Page INF - 1 lists the various Group names and numbers. To locate a part by number, refer to the Numerical Index which indicates the Part Type Code in which the number is located. To locate a part by name, refer to the Alphabetical Index which will indicate the Part Type Code a part number for specific nomenclature is listed.

In cases where only the location of the part on the vehicle is known, refer to the Illustrations for that group in which the part is located. The illustration will identify the part and provide Part Type Code information from which the part listing may be located. Parts are listed in Part Type Code sequence within the group, and reference to the proper group will determine the part number.

PART TYPE CODE SYSTEM

To simplify the listing and location of individual parts, a system of Part Codes is used in this Parts Catalog.

To illustrate, a Type of Part will be indicated as:

2-03-3 KNUCKLE, w/BUSHING

This code is broken down as follows:

2- Indicates the Major Group: "Group 2 -- Front Suspension"
-03- Indicates the Sub-Group: "03 -- Steering Knuckle"
-3 Indicates the Code for the specific name of the part: "Knuckle, w/ BUSHING"

Part Type Code 2-03-3 will always appear as "KNUCKLE, w/BUSHING."

COLOR CODED OR MIXED PART NUMBERS

Appearing throughout this catalog are part numbers containing both letters and numbers. For example: 6700FX9. These are good serviceable part numbers. The combination of letters and numbers merely indicates the parts are keyed to the interior color of the vehicles on which they are used.

INTERIOR TRIM

Refer to the trim section of the catalog for information relative to this section.

PAGE NUMBERING

Two-part page numbers are used throughout this catalog. The first part of the page designation indicates the major group or section. The second part indicates the actual page number in the group. For example:

1-1 indicates Group 1, Accessories, Page 1
2-1 indicates Group 2, Front Suspension, Page 1

In the maintenance of the Loose Leaf Parts Catalog Revision Service, it may become necessary to add information beyond the capacity of the page. In this event, an "A" page will be used. For example: If it becomes necessary, because of change, to add several part numbers to page 2-1 and space does not permit the addition, you will be given Page 2-1A. Page 2-1A should be filed immediately following page 2-1.

ILLUSTRATIONS

Refer to illustration index or also special illustration index in Group 8 and Group 23 for page reference for specific illustrations.

ALPHABETICAL INDEX

To locate a part by name, refer to the Alphabetical Index. This index indicates the Part Type Code in which various parts may be located.

NUMERICAL INDEX

Reference to any part by part number is provided in the Numerical Index. This index indicates the Part Type Code in which the number is listed.

PARTS PACKAGES

Service Parts Packages, containing all parts needed for a specific service operation, are listed in their respective groups with related parts. The listing will show adaptability and model application. The PARTS PACKAGE Section of the catalog contains a secondary listing of most major packages and respective contents of each. The listing sequence is numerical within Part Type Code.

STANDARD PARTS

Standard Parts such as bolts, nuts, etc., are listed under the major parts which they attach and are not coded. Standard Parts listed as Major Parts, such as fuses, bulbs, and bearings in the 100,000-499,999 part number series are assigned a Part Type Code and coded within the group in which they are listed.

A comprehensive listing and description of the most commonly used Standard Parts will be found under Group 18.

SPECIFYING INFORMATION

The following information is included in this Parts Catalog:

1. Part Type Code
2. Part Name
3. Part Number
4. Model Applications
5. Quantity used per vehicle
6. Effective points of series running changes by vehicle serial number, engine number and body number where applicable.
7. Description and dimensions necessary for proper identification of parts where necessary.
8. Parts not previously listed in the Parts Catalog are designated by a (#) symbol preceding the part number.
9. No. of Cyl. column
6 indicates 6 cylinder models
8 indicates 8 cylinder models
Blank indicates dual usage
10. Parts designated as "CANADA" are applicable to Canadian vehicles only. They are not available in U.S.A.
11. 70 or 71 in the description field indicates the year applicable for the part. BLANK INDICATES DUAL USAGE.

SYMBOLS USED IN THIS PARTS CATALOG

The following symbols are used in the Parts Catalog and revisions thereto:

* - An asterisk preceding a part number indicates a change or addition.

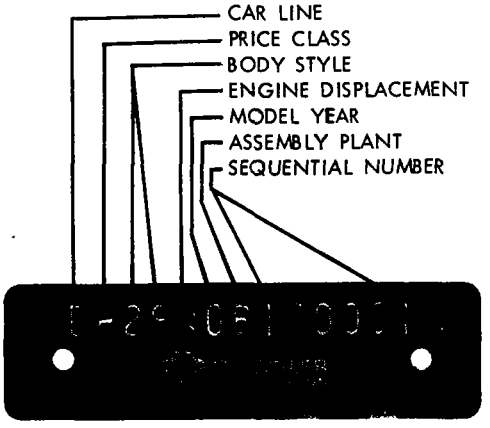
- Preceding a part number indicates parts which have been added and not previously published.

AR - In the "Model Code" column means "use as required".

PRODUCT BULLETINS

PRODUCT BULLETINS are issued when important changes are made in production or when corrections are to be made in the Parts Catalog between regular revisions.

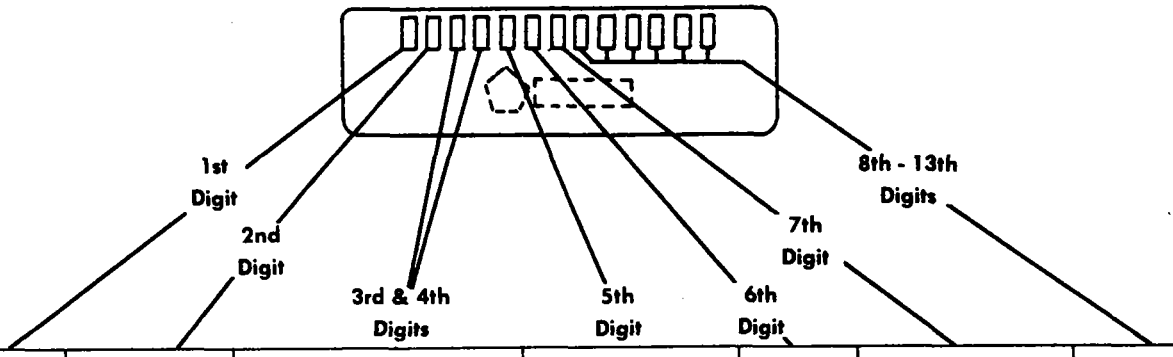
Use of the PRODUCT BULLETIN assures each catalog subscriber up to date information. All catalogs should be noted and changed accordingly to remain current between revisions.



PARTS CATALOG REVISION SERVICE

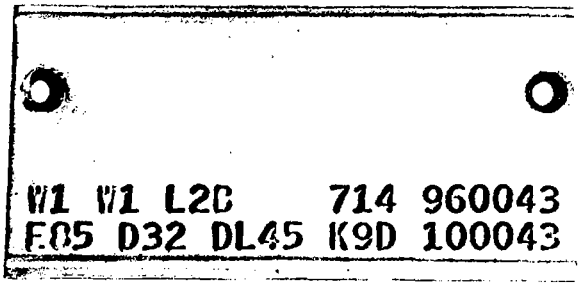
Subscribers to the Passenger Car Parts Catalog Revision Service will be periodically provided with revision copy incorporating latest information. Revision may be provided by Group or complete book copy.

Proper interfiling of the revision copy will insure the subscriber a complete up-to-date Parts Catalog.



Accompanying each mailing of a set of revision copy is a covering letter which outlines the contents of the particular revision. It is recommended that the letter be read carefully to avoid elimination of copy which is still current.

VEHICLE IDENTIFICATION PLATE



All assembly plants use a uniform method for assigning vehicle serial numbers. This number consists of 13 digits and is shown on the Vehicle Identification Plate which is located on the instrument panel - visible thru the windshield. (Always specify the vehicle serial number when ordering parts by description). A listing and description or serial numbers follows:

IMPORTANT:

Parts Division replacement engines are supplied with blank engine number bosses only. Dealers are governed by state law on the application of engine numbers. In states where license fees are based on displacement or taxable horsepower, it will be necessary to change vehicle registration if the new replacement engine differs from the one it replaces.

NOTES

3-02-0 REAR AXLE HOUSING

NOTE: The 7 1/4" diameter gear axle has a 1 3/8" diameter stem and is embossed with carrier part number 2070 062 or 2070 051 below the yoke. It has a separate cover and uses (9) nine cover screws.

NOTE: The 8 3/4" diameter gear axles with a 1 3/8" diameter pinion shaft has Carrier part number 1820657 or 2070741 embossed 2 inches below the yoke. It has a banjo type housing with welded on cover. It has (10) ten nuts that fasten the carrier assembly to the housing.

NOTE: The 1970 B,J,P,D,C and Y models with 8 3/4" diameter gear axle only used a 1 7/8" diameter pinion shaft. Carrier part number 2881 488 or 2881 489 is embossed 2 inches below the yoke.

NOTE: The 1970 R and W models with 8 3/4" diameter gear axle used a 1 3/4" and 1 7/8" diameter pinion shaft. Carrier part number 2881 488 or 2881 489 is embossed 2 inches below the yoke.

NOTE: The 1971 8 3/4" diameter gear axle with 1 7/8" diameter pinion shaft has carrier part number 2881 488 or 2881 489 embossed 2 inches below the yoke.

NOTE: The 1971 model 8 3/4" diameter gear axles only used 1 3/8" and 1 7/8" diameter stems.

NOTE: The 8 1/4" diameter gear axle has a 15/8" diameter pinion shaft and carrier part number 2852 905 embossed on it. It has a separate cover and uses (10) ten cover screws.

NOTE: Differential and Carriers have a metal tag bolted on them giving the ratio of the rear axle.

NOTE: Some 1969 8 1/4" dia. gear axles were used on the 1970 R and W models. See the 1969 book for parts.

NOTE: Some 1969 8 1/4" dia. gear axles were used on the 1970 R and W models. See the 1969 book for parts.

3-19-0 DRIVE GEAR AND PINION SET

NOTE: Differential Gear and Pinions are serviced by MATCHED SET numbers only. They are catalogued below in charted form by ratio. The chart includes other information such as Gear and Pinion numbers which generally are stamped on the item, and may be used as reference to confirm the correct Gear and Pinion Set they are contained in. The SET NUMBER must be ordered for replacement of either Gear or Pinion.

8-28-0 ALTERNATOR

NOTE; Service Alternators consist of an Alternator and Pulley. In most cases a double grooved Pulley type may be used as a service replacement of the single groove type. If not desirable, the Pulley may be transferred from the original unit.

All Alternators are stamped with a production assembly number which may or may not be the serviced Alternator. Part Type Code 8-28-3 below lists information relative to the Alternator stamped number cross-referenced to the applicable service number. The serviced part number must be ordered in all cases.

For component parts of Alternators refer to part type code 8-29-0 in which component parts are charted in code sequence in columns for the Alternator number appearing at the top of each column.

Leece-Neville Alternators and Regulators and components are not stocked in Chrysler Parts Depots. Order replacement parts for these units by description from your nearest Leece-Neville Distributor or Leece-Neville, 1374 E. 51st. Street, Cleveland, Ohio 44103.

NOTES

NOTES

IMPORTANT

SIX CYLINDER ENGINES

NOTE: The following symbols are used in connection with engine numbers. Engine numbers without symbols indicate "Standard Cylinders and Crankshaft Bearings"

The Letter "A" immediately following the engine identification number indicates Bore .020" (.508 MM) Larger than Standard.

The Letter "B" immediately following the engine identification number indicates Main and Connecting Rod Bearings .010" (.245 MM) Smaller than Standard.

The Letters "AB" immediately following the engine identification number indicates Cylinder Bore .020" (.508 MM.) Larger than Standard. Main and Connecting Rod Bearings .010" (.254 MM.) Smaller than Standard.

The Letters in the circular pads at either end of the engine number are for the use of factory inspectors only and should not be connected with engine number.

Always mention Serial Numbers when ordering major assemblies.

NOTES

EIGHT CYLINDER ENGINES

NOTE: The following symbols are used in connection with engine numbers:
ENGINE numbers without symbols indicate "Standard Cylinders and Crankshaft Bearings". The Letter "A" immediately following the engine number indicates Bore .020" (.508 MM.) Larger than Standard.
The Letter "B" immediately following the engine identification number indicates Main and Connecting Rod Bearings .010" (.245 MM.) Smaller than Standard.
The Letters "AB" immediately following the engine identification number indicates Cylinder Bore .020" (.508 MM.) Larger than Standard. Main and Connecting Rod Bearings .010" (.245 MM.) Smaller than Standard.
The Letters in the circular pads at either end of the engine number are for the use of factory inspectors only and should not be connected with the engine number. Always mention Serial Numbers when ordering major assemblies.

NOTE 1: Short Engine Assemblies Consist of the Cylinder Block with Pistons and Rings, Crankshaft and Bearings, Connecting Rods and Bearings.

NOTE 2: A383 Cubic inch engine with a two barrel carburetor may be built with a cast or forged crankshaft. The cast crankshaft type is identified by a stamped letter E located on a pad on the upper right side of the front of the cylinder block. The vibration damper has on eliptical weight in front of the main member also a cut slot in the weight. Identification must be conformed before ordering a replacement SHORT ENGINE, CRANKSHAFT, DAMPER or TORQUE CONVERTER.

14-30-0 CARBURETOR

NOTE: The entire line of carburetors for 1970 Chrysler Corporation passenger vehicles is listed on the following chart by vendor number.

Complete replacement assemblies for each vendor identified carburetor are listed in the "Chrysler Carburetor" Column.

Components of carburetors, which are available for service are charted on the following pages, beginning with Code 14-30-2. For quick reference, both the carburetor assemblies and their component listings are identified with the same "Component Chart Reference Number". (see below and on the following pages).

NOTE: *Transmission component parts for the transmission assemblies shown in code 21-02-1 below are catalogued in charted style after code 21-119-11. The respective service transmission part number and complete type code (A903-A230 etc.) is designated at the top of each chart column, and must be verified before specifying components.*
