HOW TO LOCATE PARTS

This parts catalog is divided into groups (Part-Type-Codes). Tab indexes are provided with the catalog binder to separate the major groups and sections.

Page INF-1 lists the groups by subject and number. Association of the part being sought with its' major functional application will enable the user to determine the group in which the part will most likely be found. Example: Rear Axle Ring gear and Pinion. By Reference to INF-1, it will be determined that Rear Axle is Group 3.

Many different techniques can be used to determine the specific Part-Type-Code of a part. Some are by reference to:

1. The Illustration Section for the Group.
2. The Group Fly Page.
3. The Alphabetical index section at the end of the catalog.
4. The numerical index if the part number is known.

After establishing the Part-Type-Code, the part number can be located by reference to the code. Codes are listed by major group, then by numerical sequence within the group (See the following explanation of the Part-Type-Code system).

NOTE: Most parts are listed in the application section; however, in some instances the part numbers are listed in the illustration section to enhance specifying. Example: Exterior Ornamention.

PART TYPE CODE SYSTEM

To simplify the listing and location of individual parts, a system of Part Codes is used. To illustrate, Codes are defined as follows:

2- Indicates the Major Group: "Group 2 -- Front Suspension"
-03- Indicates the Sub-Group: "03 -- Steering Knuckle"
-3 Indicates the Code for the specific name of the part: "Knuckle, w/BUSHING"

Part Type Code 2-03-3 will always be "KNUCKLE, w/BUSHING."

COLOR CODED OR COMBINED PART NUMBERS

Appearing throughout this catalog are part numbers containing both letters and numbers. For example: F223 KX9 These are good serviceable part numbers. The combination of letters and numbers merely indicates the parts are keyed to the interior color of the vehicles on which they are used.

In addition, Right and Left part numbers are frequently combined on one line; e.g.: F222-3 KX9. Such numbers are interpreted as F222 KX9, Right side application, and F223 KX9 Left side. Right and Left Sides are always determined by their relationship to the driver when normally seated and looking forward.

INTERIOR TRIM

Refer to the Group 23 Trim section of the catalog for information relative to Interior Soft and Hard Trim, Rolled Stock, etc.

PAGE NUMBERING

Two-part page numbers are used throughout this catalog. The first part of the page designation indicates the major group or section. The second part indicates the actual page number in the group. For example:

1-1 indicates Group 1, Accessories, Page 1
2-1 indicates Group 2, Front Suspension, Page 1

In the maintenance of the Loose Leaf Parts Catalog Revision Service, it may become necessary to add information beyond the capacity of the page. In this event, an "A" page will be used. For example: It it becomes necessary, because of change, to add several part numbers to page 2-1 and space does not permit the addition, you will be given Page 2-1A. Page 2-1A should be filed immediately following page 2-1.

ILLUSTRATIONS

Refer to the Master Index in the Illustration Section and/or the special index at the beginning of groups 8 and 23 for the page reference for specific illustrations.

ALPHABETICAL INDEX

To locate a part by name, refer to the Alphabetical Index. This index indicates the Part Type Code in which various parts may be located.

NUMERICAL INDEX

A listing of all Part Numbers contained in the catalog application section. The numbers are in numerical sequence with reference to the Part-Type-Code under which the numbers are found.

PARTS PACKAGES

Service Parts Packages, containing all parts needed for a specific service operation, are listed in their respective groups with related parts. The listing will show adaptability and model application. The PARTS PACKAGE Section of the catalog contains a listing of most major packages found in the catalog with the package contents identified. The listing sequence is numerical within Part Type Code.

STANDARD PARTS

Important attaching standard parts such as bolts, nuts, etc., are generally listed under the major parts which they attach. Standard parts listed as Major Parts, such as fuses, bulbs, and bearings in the 100,000-499,999 part number series are assigned a Part Type Code and are so listed within their respective groups.

A comprehensive listing and description of the commonly used and serviced Standard Parts will be found in Group 18.

SPECIFYING INFORMATION

The following information is included in this Parts Catalog:

1. Part Type Code

2. Part Name

3. Part Number

4. Model Applications

5. Quantity used per vehicle

6. Effective points of series running changes by vehicle serial number, engine number or body number where applicable. When serial number effective points are not available, production effective dates are used. (Refer to the Body Codes Plate or the Federal Certification Label for the build date).

7. Description and dimensions necessary for proper identification of parts where necessary.

8. No. of Cyl. column
6 indicates 6 cylinder models
8 indicates 8 cylinder models
Blank indicates dual usage

9. Parts designated as CANADA are available only in Canada for vehicles sold in Canada.

SYMBOLS USED IN THIS PARTS CATALOG

The following symbols are used in the Parts Catalog and revisions thereto:

- Preceding a part number indicates parts which have been added and not previously published.

AR - Indicates the quantity required may vary or is to be determined by the user.

PRODUCT BULLETINS

PRODUCT BULLETINS are issued when important changes are made in production or when corrections are to be made in the Parts Catalog between regular revisions.

Use of the PRODUCT BULLETIN assures each catalog subscriber up to date information. All catalogs should be noted and changed accordingly to remain current between revisions.

PARTS CATALOG REVISION SERVICE

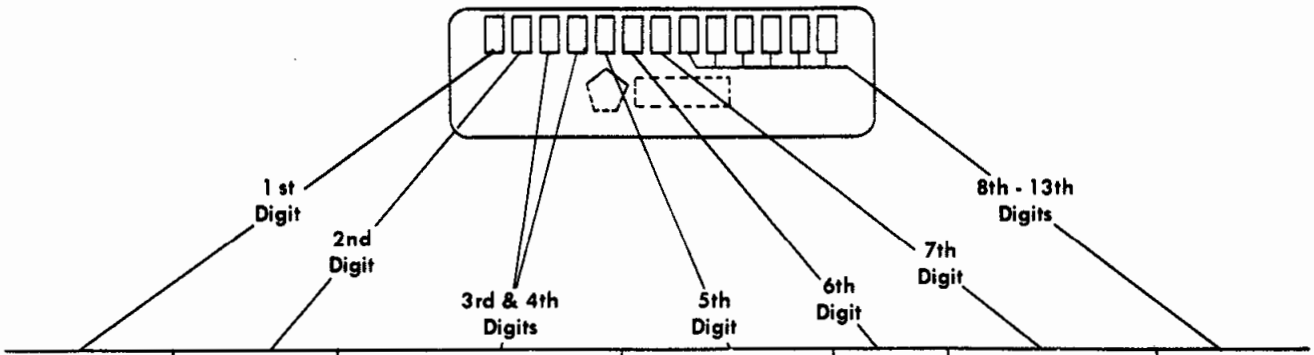

Subscribers to the Passenger Car Parts Catalog Revision Service will be periodically provided with revision copy incorporating latest information. Revision may be provided by Group or complete book copy.

Proper interfiling of the revision copy will insure the subscriber a complete up-to-date Parts Catalog.

VEHICLE IDENTIFICATION PLATE

All assembly plants use a uniform method for assigning vehicle serial numbers (VIN). This number consists of 13 digits and is shown on the Vehicle Identification Plate which is located on the instrument panel - visible thru the windshield. The VIN number (serial number) also appears on the Federal Certification Label located on the left front door frame. (Always specify the vehicle serial number when ordering parts by description). A listing and description of serial numbers follows:

ENGINE IDENTIFICATION NUMBERS

The following identification will be included on the Engine Serial Number Pad:

* = Series without M or W suffix indicates Trenton Engine Plant.

Engine Serial Number Codes Defined:

HP - High Performance
K - Series (1974)
LC - Low Compression
M - Mound Road Plant
P - Premium Fuel Recommended
R - Regular Fuel may be used
S - Special Engine
T - Trenton Plant
W - Windsor Plant

Engine Number Location:

Displacement	Serial Number Pad Located
198, 225	Right Side of Block below # 1 Spark Plug
318, 360	Left Front of Block below Cylinder Head
400	Right Side of Block adjacent to Distributor
440	Left Bank adjacent to Front Tappet Rail

CAUTION: Replacement Engine Assemblies are furnished with blank engine number pads. Dealers are governed by state and local regulations regarding the affixing of engine numbers to these engines. In states where license fees are based on displacement or taxable horsepower it will be necessary to change the vehicle registration if the replacement engine differs from the one it replaces.

Strobe Stripes

STROBE STRIPE KITS
Strobe Stripes make it possible to customize any car with a bold, distinctive design theme for side panels, hoods or rear decks.

Each Kit of continuous graduated design stripes is made of tough weather resistant vinyls that are easy to apply with the strip-off technique.

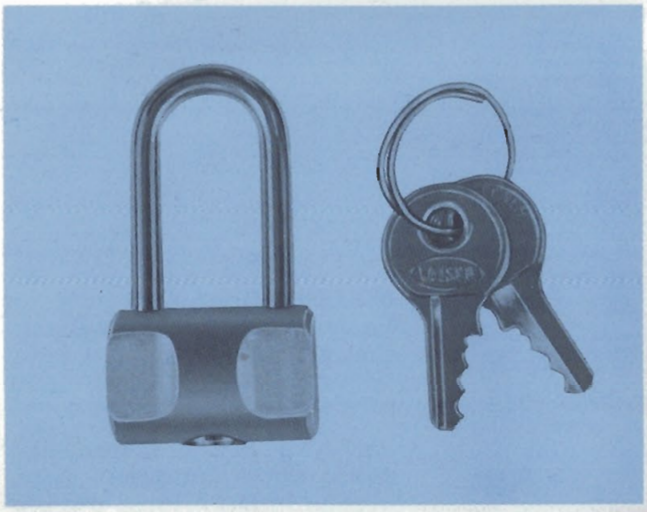

PRE-ALIGNED STRIPES
The "Pre-Aligned stripe look" used by the leading manufacturers is now available for custom, in the field, installations.

The Double-band of contrasting wide and narrow stripes and the triple-band of graduated design stripes come in black. Both designs contain enough to trim both sides of any car.

Batteries

SUREPOWER
Economical all-around service. In the most popular price range, ideal for dependable starting power and long life.

EVERSTART
Used as original factory installed equipment, this battery meets the demands of the greatest number of drivers. Everstart Batteries provide top performance - gives more value per dollar.

SUPERCHARGER
The Supercharger is specifically engineered for super performance to provide all the extra power needed to operate extra electrical accessories and still top starting efficiency. The Supercharger is designed with a high impact polypropylene container.

Mopar batteries are designed and manufactured to rigid quality standards to provide maximum cranking power and long service life. They are available in most popular sizes for both six and twelve volt applications; see chart on following page for complete specifications.

"Formula 57" (U.S. patent No. 3,198,665) sharply reduces rate of self-discharge and provides protection against the damaging effects of oxidation in the dry-charge state and from sulfation after the electrolyte has been added.

High impact rubber and polypropylene containers — heavily reinforced at points of stress to withstand the extremes of temperature.

Rubber, glass and plastic Fiber separators.

Improved super fine material—for faster starting capability.

High impact one-piece cover on the Supercharger and Everstart lines and all 12 volt Surepower batteries. No more sealing compound problems. Self-discharge across exposed top cell connectors is eliminated.

Battery Analyzer & Electrolyte

CAD-TIP BATTERY ANALYZER
Is especially designed to read cell voltages on new one-piece cover batteries, and will analyze the condition of any type battery within 1%.

The "Cad-Tip" Analyzer determines battery condition, in addition to its state of charge. The highly sensitive scale is easy to read . . . a variation of 5 or more scale divisions between individual cells indicates battery trouble.

BATTERY ELECTROLYTE SPECIFIC GRAVITY 1.265
For efficient, fast and long lasting battery performance. Electrolyte requirements vary, but most batteries require four quarts.

The 5 gallon size "EZE-PAK" features a built-in dispensing hose, ready for immediate use. A clamp is also included for fast and simple battery acid dispensing.

Six quart (1.54 gallons) electrolyte package includes a pull-out flap with attached dispenser.

Washer Solvent

PERMANENT TYPE
ANTI-FREEZE COOLANT
Assures maximum cooling system protection against winter freeze-up, overheating, seepage, clogging, foaming and corrosion. Contains special rust inhibitors to protect cooling system. Mopar Anti-Freeze reliability has been proven under the most severe driving and weather conditions.

FROST AND ICE REMOVER
Assures clear vision and safer driving by clearing frost and ice from windows quickly. Frees frozen locks, is harmless to paint, rubber plastic or metal.

WINDSHIELD WASHER SOLVENT
Assures clean windshields year 'round; prevents freezing in reservoir, in hoses or on windshield. Dissolves bug residue and road film. Harmless to paint, chrome and rubber.

Engine Additives

SUPER OIL SAVER
A viscosity improver that increases the ability of any quality motor oil to provide better lubrication in all types of internal combustion engines.

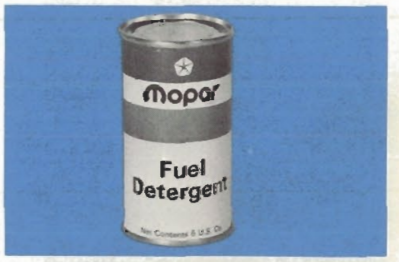

COMBUSTION CHAMBER CONDITIONER
Helps restore power and performance by removing deposits of gum, varnish and carbon from the combustion chamber, thus helps to eliminate deposit build-up problems such as pre-ignition, rough idle, poor compression and hard starting.

ENGINE OIL SUPPLEMENT CONCENTRATE
Should always be used when installing valve lifters or camshafts to eliminate the possibility of scuffing. It can also be used between oil changes to help keep engine clean.

ENGINE OIL SUPPLEMENT
Helps maintain new car efficiency, assures smooth performance and longer engine life. With present day close tolerances, high compression engines and extended oil drain recommendations, it is imperative that an oil containing the right chemicals be used to neutralize engine contaminants and keep the engine clean.

FUEL DETERGENT
Designed to clean out the combustion chamber and fuel system. Simply pour contents into fuel tank or into carburetor. When used with Combustion Chamber Conditioner, it provides upper cylinder lubrication, helps prevent valve sticking and plugs from fouling.

Engine Additives

GUM & SLUDGE REMOVER
A fast-acting compound of solvents, dispersants and detergents that cleans oil lines and removes gum, carbon and sludge from oil rings, valve guides and lifters. Developed purposely to remove crankcase contaminates and for use on older cars as a cleaner and flush.

MANIFOLD HEAT CONTROL VALVE SOLVENT-PENETRATING FLUID
Formulated to keep the manifold control valve operating freely and efficiently. It penetrates lead and rust deposits that accumulate on the control valve. A small amount should be applied to both ends of the valve shaft every thirty days and whenever the car is lubricated.

COOLING SYSTEM MATERIALS

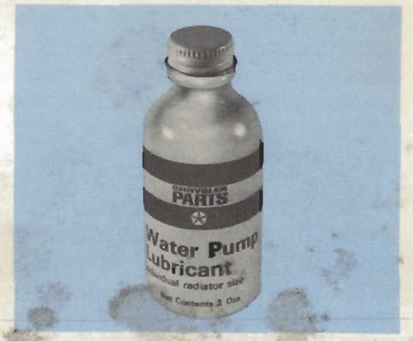

COOLING SYSTEM RUST RESISTOR & WATER PUMP LUBRICANT
Protects the cooling system from build-up of rust or scale particles by depositing a protective coating on inner walls. The water pump is continuously lubricated since the lubricant is heat resistant. Mixes freely with hard or soft water and all approved types of antifreeze.

COOLING SYSTEM STOP LEAK NUGGETS PACKAGE
Effectively seals and helps prevent radiator leaks in the entire cooling system. It will not clog air conditioning systems. It will mix with hard or soft water and all approved types of anti-freeze. Two nuggets in plastic bubble-pack display card.

WATER PUMP LUBRICANT
Use to eliminate noisy water pump squeak and chatter. This silicone lubricant is heat resistant and will not dissolve in cooling system coolant.

Fluids

DEXRON AUTOMATIC TRANSMISSION FLUID
Currently used in all transmissions as factory fill and recommended for all automatic transmissions and manual transmissions in extremely cold climates. It transmits maximum power with minimum friction. Heat resistant. Lubricates and protects gears, pumps and seals against undue wear. Mixes freely with all other qualified transmission fluids and will not form impurities or deposits. Colored for easy detection of transmission leakage.

TRANSMISSION SEALER
Specially formulated to keep seals pliable and to revitalize hard, shrunken seals. Protects transmission seals against deterioration and stops minor leaks.

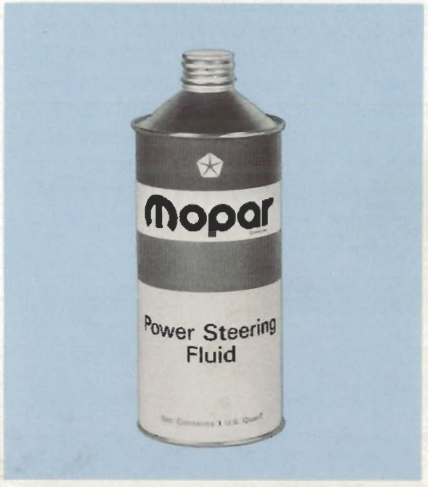

BRAKE FLUID
A new, heavy-duty type brake fluid that is recommended for use in the brake systems of all Chrysler-built vehicles. It conforms to or exceeds S.A.E. and Federal specifications for high temperatures and complies with all states having regulations governing the sale and use of brake fluids for motor vehicles.

POWER STEERING FLUID
Especially compounded to assure maximum performance and efficiency in the power steering system. Assures long life of rubber parts under all pressure and temperatures encountered. Only this fluid should by used for power steering. Other lubricants, including those designed for use in engines and transmissions, may deteriorate some of the parts in the power steering system.

Lubricants

MULTI-MILEAGE LUBRICANT
Multi-Mileage Lubricant has chemical properties which assure maximum lubrication and high resistance to the harmful effects of water, corrosion and extreme temperatures. It is recommended for lubricating ball joints, tie rod ends, torsion bars, wheel bearings, brake cables, clutch linkage and gearshift levers.

"RUGLYDE" (Clear Type)
A multi-purpose lubricant that lubricates rubber parts, eliminates squeaks and restores "new look" to floor mats, tires, etc. Ideal for mounting and demounting tires; protects tire beads and trim-seal edges. Will not affect paint.

"SIL-GLYDE" LUBRICATING COMPOUND
Effectively lubricates and eliminates squeaks from fan belts, weatherstrips, seals, bumpers, window channels and rubber gaskets. It also weatherproofs and prevents shorts in ignition system. Also protects battery terminals against corrosion.

SPEEDOMETER CABLE LUBRICANT
Especially formulated for efficient, long-lasting speedometer cable performance.

Lubricants

DISTRIBUTOR CAM LUBRICANT
Specifically formulated for the efficient lubrication of distributor cam shaft. Easy to use, handy tube.

"LUBRIPLATE"
An all-purpose heavy duty lubricant that resists rust and corrosion. It is dripless, long-lasting and packaged in a handy, easy-to-use tube. Has many uses around the home.

"LOCK EASE"
This lock fluid assures smooth working locks. Long-wearing film protects locks against rust and wear. Slight pressure on spring panel forces fluid to all parts of lock.

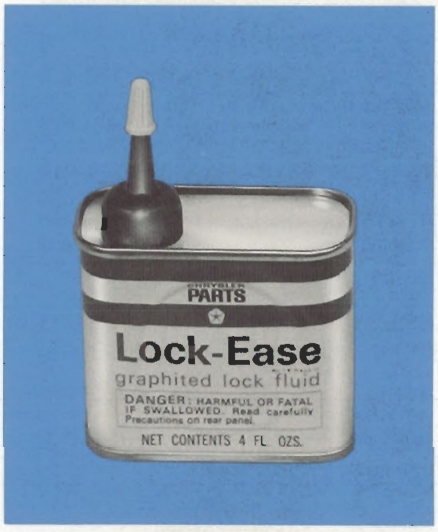

"DOOR EASE" LUBRICANT
A stainless stick lubricant which stops squeaks and reduces friction. Ideal for car doors and other areas with rubber bumper cushions. Many household uses such as sticky drawers, windows, etc.

RUST PENETRANT
Quick-acting spray type solvent that frees troublesome nuts, bolts, hinges and clamps in seconds. Dissolves rust, corrosion, chemical deposits and many other elements that hinder disassembly. Has many household uses.

Lubricants

SURE-GRIP LUBRICANT #90
Part No. 2585 318 (quart), provides maximum protection against gear scoring, scuffing and wear under normal and extreme loading conditions. It is specially formulated for use in Sure-Grip plate disk type (Spicer-Dana) limited slip differentials in axles prior to 1969, and the 9-3/4 Dana axle used in high performance vehicles in 1969 and 1970; also in trucks equipped Spicer Anti-Spin differentials.

HYPOID GEAR LUBRICANT
Part No. 3744 994 (quart) and Part No. 3744 995 (120 lb. drum), provides optimum protection against gear scoring, scuffing and wear under normal and severe loading conditions. It is recommended for use in manual transmissions, steering gears and all axles equipped with conventional differentials. It is specially formulated for use in Sure-Grip, cone clutch type (Borg-Warner) limited slip differentials used in 1969 and 1970 cars. This lubricant is also recommended for use in all axles in 1971 and later cars.

Hi-Performance Lubricants

HI-PERFORMANCE MOTOR OIL
This specially formulated Oil contains heavy duty additives that provide maximum lubrication and protection to bearings, cam lobes, tappets, piston rings, cylinder walls, etc., during Hi-Speed competitive events.

HI-PERFORMANCE AUTOMATIC TRANSMISSION FLUID
Developed for Hi-Speed competition to protect against scoring, scuffing, wear and seizure of vital transmission parts. Assures maximum lubrication and protection against power loss due to shifting drag and churning.

HI-PERFORMANCE MANUAL TRANSMISSION LUBRICANT
Helps prevent undue wear, increases heat resistance, resists foaming and decreases power loss due to shifting drag. Provides positive lubrication to all transmission components in Hi-Performance cars.

HI-PERFORMANCE REAR AXLE LUBRICANT
Provides maximum lubrication and better protection against scoring, excessive wear and overheating. Adds more usable horsepower for all Hi-Performance engines during Drag, Circuit and other high-speed competitive events.

Appearance Materials

AUTOMOBILE POLISH
This polish quickly and easily cleans and polishes all car finishes. It provides a gleaming, dry, glossy surface which repels dust and protects the paint finish.

CAR WASH LIQUID AND POWDER
Mixed with water as directed, a small quantity of these highly concentrated materials produces an extremely effective washing solution. No wiping required; just wash, rinse and allow to air dry. It leaves no ugly film or streaks when used as directed.

WASH & WAX LIQUID WITH DETERGENT
Quickly and effectively removes road grime and deposits a film of protective wax. This highly concentrated liquid mixes easily in warm or cold water. After use, the surface has a dry, nonsmearing, glossy finish.

CHROME CLEANER AND POLISH WITH SILICONES
Removes rust and tarnish from chrome, copper, stainless steel and nickel-plated parts. It leaves a clean, long-lasting, brilliantly polished surface which is highly resistant to corrosion and abrasion.

Appearance Materials

GLASS CLEANER—AEROSOL
Cleans and makes windows, lamp lenses and mirrors sparkle.

LEATHER AND VINYL CLEANER
Thoroughly cleans and renews leathers, vinyl and synthetic materials, leaving surface soft and pliable. Harmless to painted surfaces.

WAX-TREATED POLISHING CLOTH
A full 405 square inches of specially wax-treated, highly absorbent, heavy cotton flannel. Perfect for use on synthetic and other car finishes. Easily removes dust, dirt and road grime from body, glass and chrome. Excellent for furniture and many other household items.

ENGINE DEGREASER
A concentrated heavy-duty cleaner especially formulated to remove dirt, oil and grease deposits from engines, batteries, carburetors, firewalls, and tires; quickly, easily and effectively. Safer than steam cleaning—just spray on, let it soak, and hose off.

VINYL TOP CLEANER
Special formulation that thoroughly cleans vinyl tops, leaving a protective coating. Contains no abrasives. Harmless to skin, paint, rubber, chrome, etc. when used as directed.

"KAR KLEEN"
Quickly and safely restores original beauty of cloth, vinyl or leather upholstery and trim. Plastic brush top can on 12 oz. size for easy application and use. Also available in concentrated 32 oz. size for mixing up to 4 qts. of solution.

Maintenance Materials

AUTO GLASS ADHESIVE AND SEALER (DURIBBON)
Assures permanent seal, elasticity, resistance to temperature changes and positive adhesion to glass, rubber and metal. Ideal for sealing leaking and squeaking windshield, rear window and side windows. Cures into a controlled vulcanized state, permanently adhering the weather strip to the glass.

"STIC" ALTERNATOR AND GENERAL—PURPOSE CEMENT
A high temperature non-conductive cement which forms a rubbery bond which is flexible even at low temperatures and has excellent resistance to water, oil and aliphatic hydrocarbons such as gasoline, naptha, etc. This cement may also be used as general purpose adhesive for vinyls, glass, leather, wood, metals and trim materials.

VINYL BODY SIDE MOULDING ADHESIVE
Formulated to repair vinyl inserts and side mouldings due to bond failure.

STARTER BRUSH PLATE SEALER AND ADHESIVE
Especially formulated for permanent sticking power. It blocks road moisture from entering the starting motor and also prevents water vapor from entering through the transmission bell housing. It has many uses outdoors, as well as indoors for bonding rigid and many flexible materials to rigid surfaces. May be painted when dry.

Maintenance Materials

SILICONE RUBBER SEALER
Seals connections, terminals and wire harness joints. Bonds glass, aluminum, steel, ceramics and some plastics. Affix name plates and emblems without screws. Approved by Chrysler Engineering Laboratory for use as a sealer at the junction of the engine cylinder block, the intake manifold and the cylinder head to prevent leakage of oil and water.

"PERFECT SEAL" SEALING COMPOUND
This sealing compound provides a non-drying sealing film for all types of gaskets, threaded and machined joints under all temperature extremes. Always ready for use in handy pressurized spray can. Helps prevent corrosion.

LED PLATE (ANTI-SEIZING SEALANT)
An anti-seize gasket sealer that maintains its sealing properties on those parts subject to severe temperature variations. Assures easy disassembly without damage to gaskets. An excellent pipe sealer and tapping compound. Impervious to air, water, steam, etc. Protects battery terminals against corrosion.

REFRIGERANT #12 "FREON"
Specially formulated to provide maximum cooling and prevent damage to seals and lines. Approved for use in all Chrysler Corporation Air Conditioners. Available in handy 15 oz. size or 30 lb. shop size.

NOTES

Marketing Bulletin

SUBJECT WHOLESALE ALLOWANCE CREDITS

NUMBER 74-21
April 18, 1974

TO: ALL CHRYSLER MOTORS CORPORATION DEALERS

We are pleased to inform you that we have just passed another milestone in our concerted effort to expedite credits to our Dealership accounts.

Effective immediately, all Wholesale Allowance Credits will be issued on Credit Shippers that can be cross-referenced to the original documents. Credit Shippers will be accumulated and printed on the Weekly Credit Summary Invoice and identified with a printout that reads "Wholesale Compensation".

Due to field limitations on the Wholesale Allowance Computer Program, the maximum amount of credit that can be printed is $999.99, so if a total monthly wholesale allowance credit amounts to over $1,000.00 it will be printed as two credits.

EXAMPLE:

Total monthly wholesale allowance credit amount is $1,285.76.
Credit Invoices will print out . . .

$999.99 "Wholesale Allowance"
$285.77 "Wholesale Allowance"

Computerization of credits substantially reduces processing time, provides credit shippers and weekly credit summary invoices for easy cross-reference, and makes our credit policy compatible with our order processing procedure.

We will continue our efforts to provide improved service to you, our customers.

SUBJECT: '74 MOPAR ACCESSORY PROGRAM

NUMBER: MB 73-18

September 18, 1973

Designed to complement and accent the beauty of Chrysler Corporation 1974 Models, Mopar presents a broad, new line of custom accessories to help increase sales and profits in your dealership. The following elements are included in the enclosed '74 Mopar Accessory Kit:

- OWNER'S GLOVE BOX FOLDER - (81-670-0401)
  This attractive, full-color folder is included in every Owners Manual and Warranty Package to stimulate sales to your most important customer -- the new car buyer.

- ACCESSORIES WALL CHART - (81-670-0417)
  Highlighting the '74 action-accents theme, this full-color wall chart should be displayed in your showroom or other high-traffic area to remind your customers about the many custom accessories you can supply.

- SALESMAN'S POCKET PRICE LIST - (81-670-0415)
  A handy, pocket-sized list of major accessories with write-in space for "installed" prices. A quick reference guide for all new car salesmen.

- PARTS MANAGER'S ACCESSORY CATALOG - (81-670-0414)
  An illustrated, loose-leaf reference guide designed to simplify ordering -- shows product features, model application, part numbers and suggested list prices where established.

There's your "PLUS-PROFIT" Package for the '74 model year -- Review the many new accessories such as:

- "Deluxe-Custom" Air Conditioning (in-dash mount) for Fury, Monaco and Chrysler.

- AM-FM Multiplex Stereo Radio for Barracuda, Challenger, Satellite, Coronet, Charger -- also including tape player, if desired, for Fury, Monaco, Chrysler and Imperial.

- Auto, Home, Portable Stereo and Cassette Tape Players plus a wide variety of custom and universal speaker packages.

- Power Steering and Power Brake Conversion Packages for all models.
- Increasingly popular Speed Control Units for Fury, Monaco, Chrysler and Imperial. Also "B" body applications will be announced soon.
- New Electric Deck Lid Lock.
- Complete line of Trailer Hitches and Tow Bar Kits.
- Electronic Digital Clock famed for accuracy.
- Vinyl Floor Mats in new colors.
- A complete assortment of other X-TRA Profit Makers.

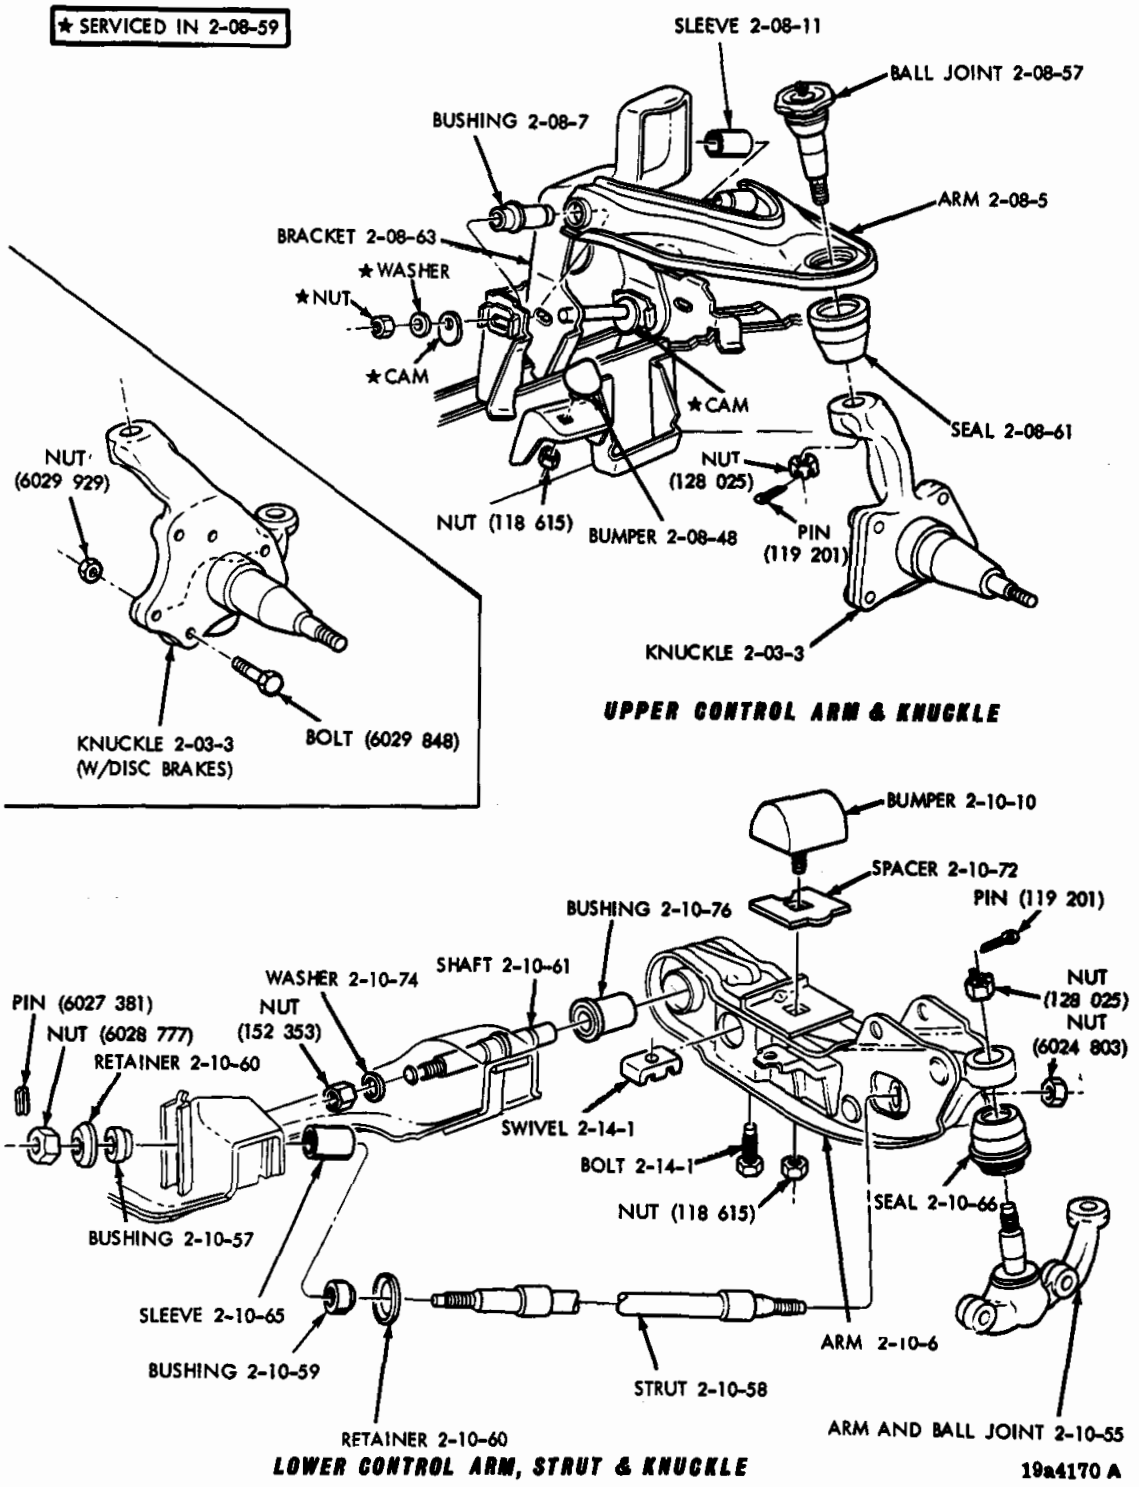

Be prepared to install or deliver these fast-moving Mopar Accessories for your customers -- ORDER an assortment Today and increase your Total Profit on every new car sale!

3-19-1 GEAR and PINION SET, Drive

NOTE: Differential Gear and Pinions are serviced by MATCHED SET numbers only. They are catalogued below in charted form by ratio. The chart includes other information such as Gear and Pinion numbers which generally are stamped on the item, and may be used as reference to confirm the correct Gear and Pinion Set they are contained in. The SET NUMBER must be ordered for replacement of either Gear or Pinion.

NOTE: Gear and Pinion Service Sets in some instances replace two or more original equipment sets. Therefore there may be two or more Gear and Pinion numbers applicable to a given Service Package as shown below.

NOTE: Service Alternators consist of an Alternator and Pulley. In most cases a double grooved Pulley type may be used as a service replacement for a single groove type; If not desirable, the Pulley from the original unit may be transferred to the new alternator.

All Alternators are stamped with a production assembly number which may or may not be the serviced Alternator. Part Type Code 8-28-3 below lists the Alternator stamped production number cross-reference to the applicable service number. The SERVICED PART NUMBER must be ordered in all cases.

For component parts of Alternators refer to part type code 8-29-0 in which component parts are charted in code sequence in columns for the Alternator number appearing at the top of each column.

LEECE-NEVILLE ALTERNATORS and REGULATORS and COMPONENTS are not stocked in Chrysler Parts Depots. Order replacement parts for these units by description from your nearest Leece-Neville Distributor or Leece-Neville, 1374 E. 51st Street, Cleveland, Ohio 44103.

IMPORTANT

SIX CYLINDER ENGINES

NOTE: The following symbols are used in connection with engine numbers. Engine numbers without symbols indicate "Standard Cylinders and Crankshaft Bearings"

The Letter "A" immediately following the engine identification number indicates Bore .020" (.508 MM) Larger than Standard.

The Letter "B" immediately following the engine identification number indicates Main and Connecting Rod Bearings .010" (.245 MM) Smaller than Standard.

The Letters "AB" immediately following the engine identification number indicates Cylinder Bore .020" (.508 MM.) Larger than Standard. Main and Connecting Rod Bearings .010" (.254 MM.) Smaller than Standard.

The Letters in the circular pads at either end of the engine number are for the use of factory inspectors only and should not be connected with engine number.

Always mention Serial Numbers when ordering major assemblies.

Marketing Bulletin

SUBJECT: **ENGINES-LESS-ACCESSORIES**

NUMBER: MB 74-1
January 7, 1974

File Code: 9-1-24

To provide better availability and service to our dealers and customers and reduce inventory requirements, a new service policy has been established to service Engine-Less-Accessories, minus the Water Pump, for all 1974 and later assemblies.

The Water Pump from the replaced Engine can be transferred to the new Short Engine or a new Pump may be specified and used if necessary.

When present stocks of Engines-Less-Accessories (with Water Pump) become exhausted, they will be replaced by new Engines-Less-Accessories (without Water Pump).

Please NOTE your records and order stock accordingly.

EIGHT CYLINDER ENGINES

NOTE: The following symbols are used in connection with engine numbers:
ENGINE numbers without symbols indicate "Standard Cylinders and Crankshaft Bearings". The Letter "A" immediately following the engine number indicates Bore .020" (.508 MM.) Larger than Standard.
The Letter "B" immediately following the engine identification number indicates Main and Connecting Rod Bearings .010" (.245 MM.) Smaller than Standard.
The Letters "AB" immediately following the engine identification number indicates Cylinder Bore .020" (.508 MM.) Larger than Standard. Main and Connecting Rod Bearings .010" (.245 MM.) Smaller than Standard.
The Letters in the circular pads at either end of the engine number are for the use of factory inspectors only and should not be connected with the engine number. Always mention Serial Numbers when ordering major assemblies.
NOTE: Only quantities of more than one per car will be shown in parenthesis at the end of each nomenclature.

EIGHT CYLINDER ENGINES

NOTE: (1) When a complete overhaul engine gasket set is required for 8 cylinder engines
Use Upper and Lower Engine Gasket Sets Part Type Code 9-01-5 and Oil Seal Package Part Type Code 9-11-1 and Intake Manifold Gasket Part Type Code 9-50-6 also Exhaust Manifold Gasket Part Type Code 9-50-5.
NOTE: (2) When a valve grinding gasket set is required for 8 cylinder engines
Use Upper Engine Gasket Set Part Type Code 9-01-5 and Intake Manifold Gasket Part Type Code 9-05-6 also Exhaust Manifold Gasket Part Type Code 9-50-5.

NOTE 3: Short Engine Assemblies Consist of the Cylinder Block with Pistons and Rings, Crankshaft and Bearings, Connecting Rods and Bearings
NOTE 4: A 440 Cubic inch engine may be built with a cast or forged crankshaft. The cast crankshaft type is identified by a stamped letter E on a pad on the upper right side of the front of the cylinder block.
NOTE: The vibration damper has an elliptical weight in front of the main member. Also a cut slot in weight with the wording "Use with 440 cast Crankshaft only". The 1 Counterweight of the 440 cast crankshaft will show the face of a clock. Identification must be confirmed before ordering a replacement SHORT ENGINE, Crankshaft, Damper or Torque Converter.

NOTE: Serviced carburetors are compiled in code 14-30-1 below, which reflects models, engine displacement, transmission type, mfrgs. reference, and a chart reference number from which serviced components may be located for a specific carburetor. Gasket kit and repair kit content information can be located on the typical illustration for the type of carburetor.

NOTE: Later Prod. Carbs. Start w/Ref. # 37

81-690-1172

NOTE:

A new color coded Trim Numbering System has been introduced for 1974. The new number consists of one alpha, three numerics and the three character alpha numeric suffix; e.g. E810 JX9, while the comparable prior year number would be 6197 JX9.

Provision has been made in order processing to handle supersedence in a routine manner.

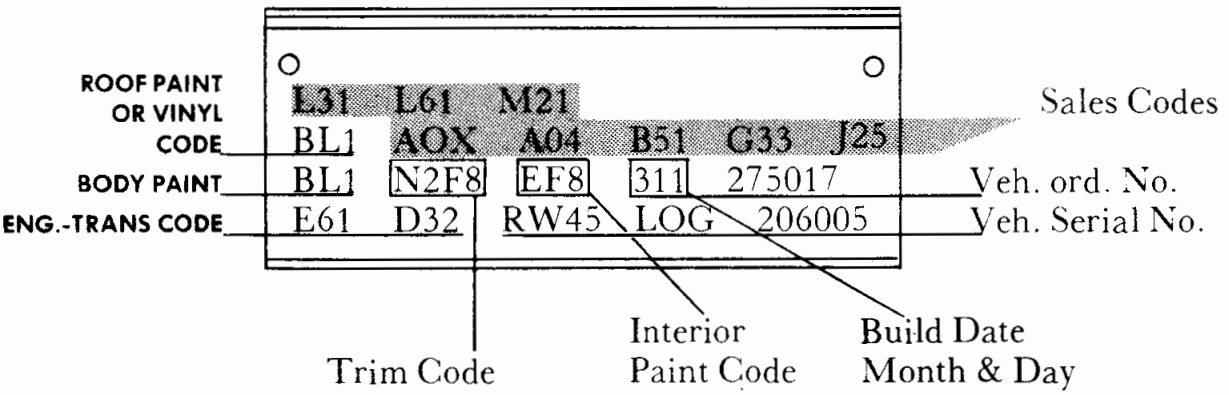

GENERAL TRIM INFORMATION

COLOR CODED OR COMBINED PART NUMBERS

Appearing throughout this catalog are part numbers containing both letters and numbers. For example: D500 KB7. This is a good serviceable part number. The combination of letters and numbers merely indicates the part is keyed to the interior color of the vehicles on which it is used. In addition, Right and Left part numbers are frequently combined on one line; e.g.: D500-1 KB7. Such numbers are interpreted as D500 KB7, Right Side application, and D501 KB7 Left Side. Right and Left Sides are always determined by their relationship to the driver when normally seated and looking forward.

BODY CODE PLATE

The body code plate contains information relative to the vehicle trim and paint codes which are required to specify proper trim items. The plate is located on the left front fender side shield or wheel housing on compact, Sport and intermediate models and on the left side of the upper radiator support on full size cars. A sample plate and description follows:

INTERIOR TRIM GRAPHICS

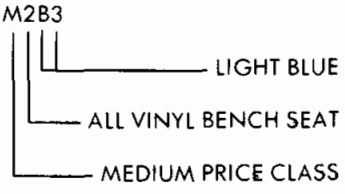

The Graphics Included in this section are typical.

The NUMBERS shown on Graphics indicate the distribution and type of material. Refer to Roll stock information Section for the particular carline for number identification.
